

“At PNRI, today’s revolution in biomedical research is generating tomorrow’s breakthroughs in disease prevention.”

–John Wecker Ph.D., President & CEO

ABOUT PNRI

Pacific Northwest Research Institute (PNRI) is an independent, non-profit, bio-medical research institute founded in 1956 by Dr. William Hutchinson to “correct man’s infirmities.” Today, PNRI is dedicated to that promise—seeking cures, treatments, and preventions for human disease using the latest and most promising technologies. We strive to create a healthier, more hopeful future through leading-edge scientific research.

PNRI believes that better understanding the interaction between the environment and genetics will lead to insights into the prevention of human diseases. This is why we have made significant investments in technologies to analyze large-scale, complex datasets including: high throughput computing, next generation genome sequencing, bioinformatics, and information theory methods.

The Pacific Northwest Research Institute is dedicated to conducting innovative research that aims to unravel the secrets of complex diseases:

- Advancing innovative research ideas
- Developing promising research programs into measurable health impacts
- Maximizing the potential of our research by partnering and collaborating at an international and institutional level

Board of Trustees

Erik Iverson, J.D.—*Chair*
 Carl E. Byrnes—*Treasurer*
 Cindy Haba—*Secretary*
 Mike Boyle
 Catherine Fisher
 Howard Frumkin, M.D., Dr.P.H.
 Allison Handy
 Tom Hayward, J.D.
 Stephan R. Martinez
 Linda Mauzy
 Susan McConnell
 Margaret McCormick
 Neil McDonnell
 Joe Piper
 Ron Sims

Leadership

John Wecker, Ph.D.
President & CEO
 Bryon Epp
Chief Financial Officer
 Norma Fuentes
Chief Development Officer
 Judy Lytle, Ph.D.
Director, Strategic Alliances

Principal Investigators

Lydia Aguilar-Bryan, M.D., Ph.D.
 Joseph Bryan, Ph.D.
 Aimée Dudley, Ph.D.
 David Galas, Ph.D.
 William A. Hagopian, M.D., Ph.D.
 Sen-itiroh Hakomori, M.D., Ph.D.
 Joseph Nadeau, Ph.D.
 R. Paul Robertson, M.D.

Adjunct Scientist

John Mulligan, Ph.D.
